STAB-O-MAT®

A broad path to success

As the world market leader for gas springs and hydraulic vibration dampers and as a kinematics specialist, STABILUS is a competent partner for its customers and with more than 15,000 product variants, it can offer the right solution for any application. Our unique technologies are classified into the following product groups:

■ **LIFT-O-MAT:** Gas springs for variable opening, positioning and holding across the entire adjustment range, such as they are used in the furniture sector and the automotive and commercial vehicle industry, in building mechanical systems and other industrial applications.

■ **BLOC-O-LIFT:** Locking gas springs for variable adjustment with even force distribution across the entire stroke, such as in height-adjustable tables, standing desks, work surfaces and applications in medical technology.

■ **STAB-O-MAT / STAB-O-BLOC:** Ready-to-install swivel chair gas springs in different installation lengths for comfortable shock absorption over the entire adjustment range.

■ **STAB-O-SHOC:** Supportive damper technology in various models for applications requiring high forces, such as convertible roofs, belt tensioning and steering systems in automotive applications,

commercial vehicle seats, washing machines, smoke exhaust flaps, as well as heavy lids and doors that open vertically.

■ **POWERISE:** Electromechanical drive systems that are used in the automotive sector for safe, convenient opening and closing of trunk lids and tailgates. In this area, STABILUS as a system supplier will assume responsibility for the overall function.

STABILUS stands for technology leadership, excellent service, professional consulting and guaranteed quality standards.

迈向成功的大道

作为世界领先的气弹簧和液压震动阻尼器供应商，同时作为动力学专家，斯泰必鲁斯是我们客户的卓越合作伙伴。我们拥有超过15000种产品型号，能够根据客户的不同需求提供最佳解决方案。我们独特的技术可以分为以下产品类型：

■ **LIFT-O-MAT:** 是指在整个调整范围内可开启，定位，和固定，因此可以应用在家具行业，汽车与商用车辆行业，建筑机械和其他工业行业的气弹簧。

■ **BLOC-O-LIFT:** 是指在整个行程中可变调节，力值均匀分布的锁止式气弹簧，因此可以使用在高度可调桌，站立式办公桌，工作台和医疗科技领域的应用。

■ **STAB-O-MAT:** 是指可直接安装的转椅用气弹簧，其在整个调整范围内的不同安装长度可进行舒适性减震。

■ **STAB-O-SHOC:** 是指支持型阻尼器技术，可应用在敞篷车顶，皮带张紧和转向系统等汽车应用领域，

以及商用车座椅，洗衣机，排烟机，以及垂直打开的重型行李箱盖和车门等需要较大支撑力的多种应用模式。

■ **POWERISE:** 是指用于汽车行业的机电驱动系统，以安全便捷的开启和关闭行李箱盖和尾门。在这方面，作为系统供应商，斯泰必鲁斯将对总体功能负责。

斯泰必鲁斯代表着技术领先，卓越服务，专业技术咨询，和有保证的质量标准。

Stabilus moves

The innovative gas springs and dampers from Stabilus assist with lifting and lowering, opening and closing. They move, hold and dampen. Our gas springs and dampers are used wherever automatic, force-assisted opening at a defined speed, variable positioning and safe holding in place are required, such as lids, doors, etc. – be it in automobiles or utility vehicles, swivel chairs or industrial systems.

In addition to innovative high-

quality, high-end products, Stabilus stands for efficient, customer-oriented solutions. We take a standard product and customize it according to the requirements and wishes of our customers. Or we develop a new one. We refine, optimize, improve. Continuously. As a Stabilus customer, you expect the highest quality and maximum performance in service and individualized consultation. When designing

our processes, the most important benchmark we use is always customer satisfaction:

Your satisfaction is our goal.

Stabilus 动向

斯泰必鲁斯制造的创新型气弹簧和阻尼器能够帮助实现举升和降下，打开与关闭。它们移动，保持，和减震。我们的气弹簧和阻尼器能够以设定的速度，可变的位置，安全的固定，使用在任何自动的以及外力助动的开启功能，因此能应用在汽车或多用途运载车的车盖和车门，转椅，或工业系

统等。除创新型优质高端产品外，斯泰必鲁斯还提供以客户为导向的高效解决方案。我们可以以标准产品为基础，然后根据客户的要求和愿望进行定制，我们也可以为客户开发新的产品。我们持续改善，优化，提高。作为斯泰必鲁斯的客户，您可获得最高质量和最佳表现的服务和个性化咨询。在流

程设计时，我们始终以客户满意度作为最重要的基准。

您的满意是我们的目标。

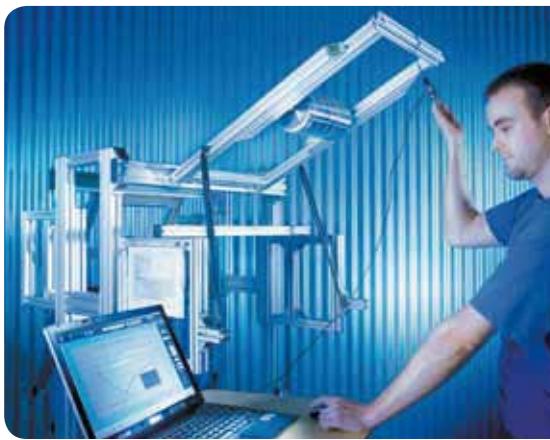

Quality and environment

We stand behind the quality of our products, which we ensure through continuous improvement processes and by developing and systematically monitoring our production processes. An important success factor for Stabilus: All major production technologies and machines in the plants worldwide are Stabilus' own design; they are developed and built in Koblenz. Combined with highly qualified and committed employees, we can guarantee consistently high product quality. Of course we meet the high requirements of international standards, such as DIN EN ISO 9001:2000, ISO/TS 16949:2002.

The highest quality that you can rely on!

Our environment matters: Stabilus assumes responsibility – not just for quality, technology and customer service. Our company complies with environmental conditions and regulations and uses proactive, gentle processes to save natural resources. Sustainability is an important part of our company philosophy. The success of our environmental protection measures is documented by our certification according to DIN EN ISO 14001:2004 and validation according to the EC Eco-Audit Regulations (EMAS).

Our technologies of today will protect the world of tomorrow.

质量和环境

我们以产品质量为后盾，并通过持续改进及开发和系统监控生产流程保证质量。斯泰必鲁斯的一个重要成功因素：世界各地工厂的所有关键生产技术和机器都是斯泰必鲁斯自己设计的；并在科布伦茨进行开发和制造。加上拥有高素质和忠诚的员工，我们可以始终保证高产品质量。当然，我们符合国际标准的高要求，比如DIN EN ISO 9001: 2000、ISO/TS 16949: 2002。

您可依靠的最高质量！

我们的环境保护：斯泰必鲁斯不只对质量、科技和客户服务负责。我们遵守环境条件和法规，并采用主动和柔性工艺以节约自然资源。持续性是我们公司理念的一个重要部分。

我们根据DIN EN 14001: 2004认证环境保护措施成功的记录，并根据EC Eco一审计法规（EMAS）进行验证。

我们今天的科技将保护明天的世界。

Gas springs and dampers – a multitude of uses

Successfully used in the vehicle and furniture industries for decades, our gas springs and hydraulic dampers are now an essential design element in numerous industrial applications in a wide range of industries. Their compact design, high level of functional convenience and operational safety will support a vast range of new applications for Stabilus products.

Gas springs and dampers assist in adjusting table and chair height, opening horizontal kitchen cabinet doors or lifting bedframes and head boards. They are used in hospital beds, operating tables, massage tables and in the rehab sector. Or they make opening skylights and operating awnings easier. Thanks to gas springs and dampers, flaps, hoods and lids are easier to open and adjust. They are also used to

conveniently open engine hoods, cab doors and hatches and safely hold them in place. In busses and airplanes, they provide ease of opening and damped closing in luggage compartments. Passenger seat backrests can be adjusted easily and comfortably. In agricultural machinery, they dampen jolts from uneven driving surfaces, allowing for comfortable, relaxed and ergonomic seating.

Stabilus technology gives comfort!

气弹簧和阻尼器——众多用途

我们的气弹簧和液压阻尼器已成功用于车辆和家具业数十年，并且如今已成为各行业许多工业应用中的主要设计元素。其紧凑设计、高度功能方便性及操作安全将支撑斯泰必鲁斯产品的大量新应用。

气弹簧和阻尼器有助于调节桌椅高度，打开水平橱柜门或升高床架和护顶板，用于医院病床、手术台、按摩台和康复行业。或者使得打开天窗和操作遮阳蓬更为容易。有了气弹簧和阻尼器，翻板、罩盖和行李箱盖更容易打开和调节。气弹簧和阻尼器也用于方便地打开发动机罩、驾驶室门和舱口，以

及将它们安全固定在位。在公共汽车和飞机上，气弹簧和阻尼器使得行李舱更容易打开，并防止其关闭。乘客座椅靠背可以方便和舒适地进行调节。在农业机械中，可防止不平的工作面发生震动，使得乘坐舒适、放松并符合人体工程学。

斯泰必鲁斯科技创造舒适！

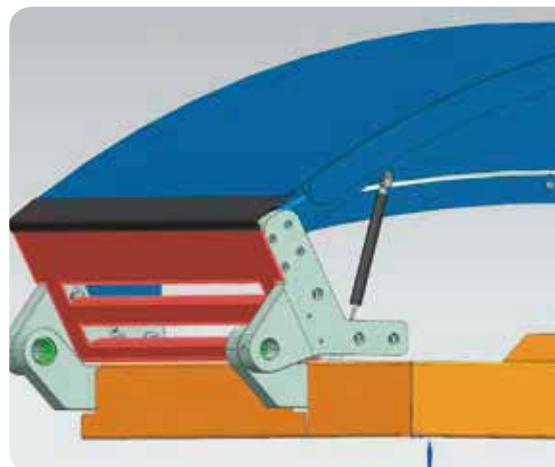

Service includes application consulting

Each installation situation has its specific requirements. Providing individual solutions for your task is what drives us. We offer service, meaning extensive application consulting, including installation proposal and construction of samples. System and standards are defined in a dialog with our customer. From the initial idea to series maturity of the optimum individual solution, the expertise of our team of engineers, specialists, and experienced application consultants will be at your fingertips.

Put us to the test! We will grow with your demands.

Visit our website, where you can use the CAD-Configurator to download your individual gas spring from our standard product line as a 3D model or 2D drawing into your CAD system:

Stabilus.cadclick.com

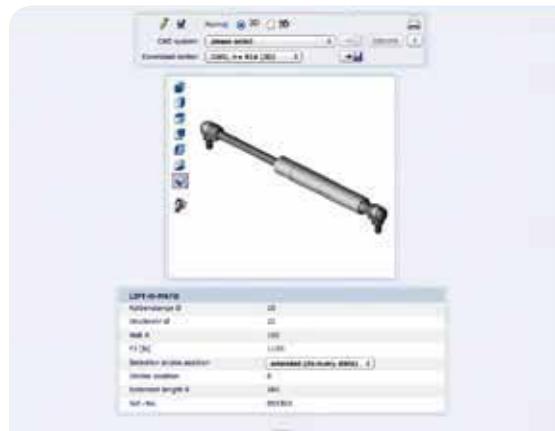

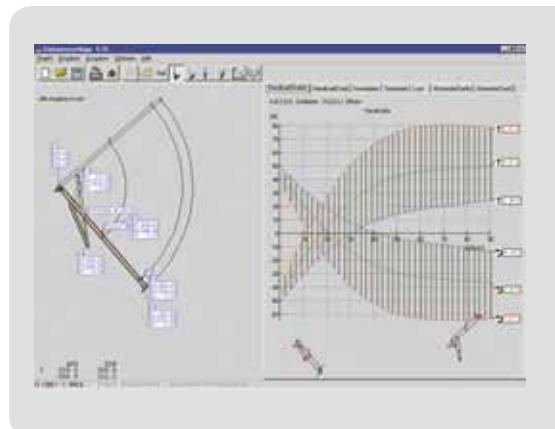

我们的服务包括应用咨询

每种安装情况有其特定要求。为您的任务提供单个解决方案是我们的驱动力。我们提供服务，即广泛的应用咨询，包括安装建议和样本构造。在与客户的对话中确定系统和标准。从最初设想到一系列成熟的最佳个人解决方案，我们工程师、专家和经验丰富的应用咨询师团队的专门技术对您来说触手可及。

您的检验，会使我们因您的需求而成长。

访问我们的网站，您可以使用CAD配置器从我们的标准产品线下载个性化的气弹簧进入您的CAD系统，作为3D模型或者2D图纸。

Stabilus.cadclick.com

Broad standard product line

Our gas springs and dampers have become a staple in our comfort-oriented world. They provide safety in function and use. Any product properties that the user experiences as especially pleasant will increase value perception. Gas springs and dampers from Stabilus assist with lifting and lowering, opening and

closing. They provide force assist and weight compensation, but are also used for damping and locking. Our comprehensive standard product line will take your individual solution to series production, as it will save elaborate development time for many applications. It includes a wide variety of gas springs and

dampers with different dimensions, speed curves, and push-out variants. Stabilus also offers a broad range of fittings – from metal ball studs to metal joints, which are very quick and easy to install.

Do you want to move something, too? Talk to us!

多元的标准产品线

我们的气弹簧和阻尼器已成为以舒适为导向的世界中的主要产品，具有功能安全性和使用安全性。让使用者感觉到特别愉快的任何产品特性将提升价值认知度。斯泰必鲁斯的气弹簧和阻尼器有助于物体举升和降下，打开和关闭。它们提供辅助力和重量补偿，

但也可用于阻尼和锁止。我们全面的标准产品线将使您的个性化解决方案用于系列生产，从而节省许多新应用的开发时间。我们的产品具有多样的尺寸、速度曲线，和弹伸方式。斯泰必鲁斯还提供广泛的配件选择——包括金属球头螺栓和金属接头，安装

起来非常快捷容易。

您也想移动什么吗？告诉我们即可！

Gas spring characteristics

■ How gas springs work

A gas spring is a hydropneumatic adjustment element consisting of a pressure cylinder, piston rod with piston, as well as suitable end fittings. It is filled with compressed nitrogen, which – at the same pressure – acts on different-size piston cross sections, creating a force in the extension direction.

This extension force can be accurately defined within physical limits by selecting the right fill pressure.

■ Spring characteristic curve and F₁ force

The spring characteristic curve describes the force curve over the stroke, i.e., from the extended to the compressed state or vice-

versa. Gas springs have a very flat, almost linear characteristic curve, allowing for even, smooth adjustment or swivel motion. In addition to its dimensions, the F₁ force is the most important descriptive characteristic when choosing a gas spring. It defines the spring force value and is measured 5 mm before the extension motion ends in hydraulic damping and 10 mm in dynamic damped gas springs.

■ Extension speed and damping

A major advantage of a gas spring over a mechanical spring is the definable extension speed, allowing for a damped and convenient adjustment motion. In **hydraulic damping**, the extension speed depends on the arrangement and di-

ameter of the bores in the piston, as well as the viscosity of the oil used. If the gas spring is installed with the piston rod pointing down, the piston will move first through the gas-filled, then the oil-filled part of the pressure cylinder when extending. As soon as the piston enters the oil, the piston rod will move at a much slower speed.

Dynamic damped gas springs

have a longitudinal groove in the pressure cylinder wall instead of a bore in the piston, acting as a bypass. The groove geometry and length will determine the damping curve. This technology allows for orientation-independent gas spring damping.

气弹簧的特性

■ 气弹簧如何工作

气弹簧是一种液压气动调节元件，由压力管，带活塞的活塞杆及合适的接头组成。其内部充有压缩氮气，在相同压力下，压缩氮气作用于截面尺寸不同的活塞上，从而在弹伸方向上产生弹伸力。此弹伸力可通过调整填充压力来精确控制。

择气弹簧时，除尺寸外，F1 力值是最重要的描述性特性。其确定了弹簧力值，它是在液压阻尼气弹簧的弹伸运动结束前 5 mm 处，或是在动态阻尼气弹簧的弹伸运动结束前 10 mm 处测量。

■ 弹伸速度和阻尼

气弹簧相对于机械弹簧的一个显著优势是具有可定义的弹伸速度，从而可以实现便捷的运动调整和阻尼效果。对于**液压阻尼气弹簧**，其弹伸速度取决于活塞内部流路的布局和孔径的大小以及所用油的粘度。如果气弹簧活塞杆朝下安装，弹伸时活塞首先通过压

力管内充填气的区域，然后再通过压力管内充填油的区域。一旦活塞进入充填油的区域，活塞杆的运动就会以更慢的速度移动。

动态阻尼气弹簧：其活塞小孔被压力管壁上一条长沟槽取代，成为一条旁路。沟槽的几何形状和长度决定了其阻尼效果曲线，这种技术在任何位置可以产生气弹簧阻尼。

■ 弹簧特性曲线和F1力值

弹簧特性曲线描述了整个行程中的力值曲线，也就是说，从弹伸状态到压缩状态，反之亦然。气弹簧的特性曲线非常平坦，几乎为线性，从而能实现均匀流畅的调整或回转运动。在选

LIFT-O-MAT gas springs

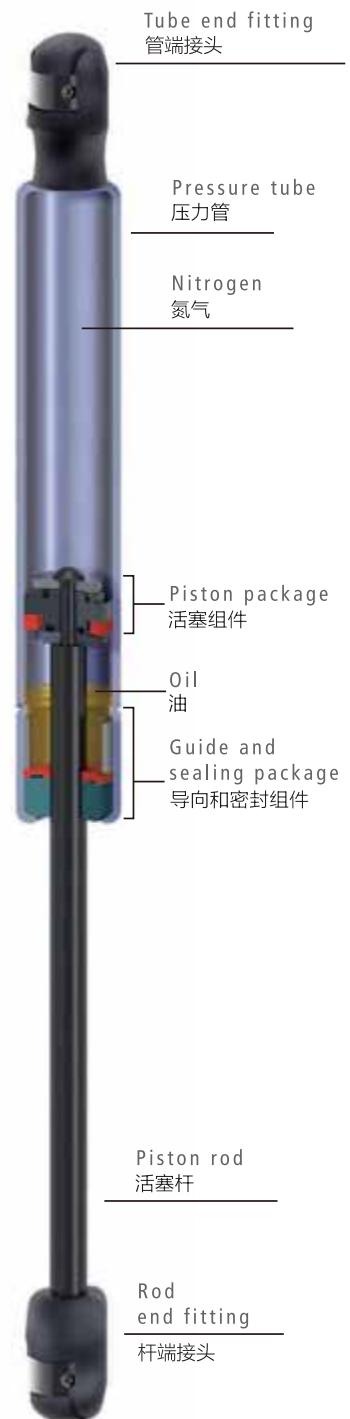

LIFT-O-MAT gas springs are non-locking gas springs. They are used whenever components must be brought conveniently into a defined end position. A LIFT-O-MAT can control the extension force and damping action depending on the function, ensuring user-friendly motion sequences.

Areas of application are doors and flaps in mechanical engineering and process technology, the automotive sector, medical technology, the furniture industry and many other applications.

Advantages and properties:

- Optimized weight compensation during lifting, lowering, opening, and closing actions
- Broad range of sizes and force variants available as standard products

- Dynamic and hydraulic damping available
- Flat spring characteristic curve; i.e., low force increase, even with high forces and large strokes
- Choice of linear, progressive, or decreasing spring characteristic curves
- Compact form factor for installation in small spaces
- Large variety of end fittings for efficient assembly
- Dampened adjustment motion over defined ranges or continuously
- Extension speed control possible
- Additional functions, such as electric switches, STOP function, holding in place, etc. can be integrated

LIFT-O-MAT 气弹簧

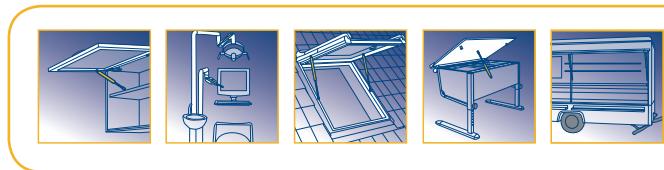

LIFT-O-MAT气弹簧属于自由式气弹簧，它们可使用在需要将物料件方便的放置到规定位置的任何场合。

LIFT-O-MAT气弹簧可根据功能需要来控制弹伸力和阻尼效果，从而确保操作更人性化。

优点和性能

- 优化举升，降下，打开，和关闭过程中的重量补偿
- 作为标准产品，拥有多样的尺寸选择和力值范围
- 可根据应用选择液压阻尼和动态阻尼

- 弹簧特性曲线平坦，也就是说，即使在高力值和大行程的情况下，其力值也增加缓慢
- 可选择线性，渐进式，或递减式弹簧特性曲线
- 安装空间狭小时，可选择紧凑型的规格
- 丰富的接头选择可促进高效装配
- 可在规定范围内进行阻尼调整，也可持续进行
- 弹伸速度可控
- 其他功能，如电子开关，停止功能，固定在位等，这些功能也可综合运用。

LIFT-O-MAT specialty types

1 LIFT-O-MAT FR – for infinitely variable holding in place

The LIFT-O-MAT FR is a gas spring featuring a special piston package with an integrated friction element, which – in addition to force assist – allows infinitely variable holding over the entire adjustment range. Even weight fluctuations between defined limits, for example due to varying loads, can be offset.

2 HYDRO-LIFT

The HYDRO-LIFT features a valve in its piston, which, in addition to user-optimized force assist, allows infinitely variable positioning. Depending on the design of the HYDRO-LIFT, the hold function can be active across the entire adjustment range or in one or more partial sectors of the application.

3 INTER-STOP with holding range

The INTER-STOP gas spring combines the properties of the LIFT-O-MAT with dynamic damping and the holding force working in the extension direction. The stroke can be divided into two or more function areas. For example, one function area might perform the stopping or hold the application load in any position, until a manual force is applied, for example by hand.

4 LIFT-O-MAT – with end position locking

In addition to force support, the LIFT-O-MAT gas spring with end position locking also provides a safe mechanical lock for the application in the extended position. Generally, two variations are available: Gas springs with the lock on the outside or gas springs with the lock on the inside.

5 LIFT-O-MAT – with decreasing or progressive spring characteristic curve

LIFT-O-MAT gas springs with additional coil springs will cause very high or very low spring forces in the end positions, depending on installation orientation. Depending on the application or requirement, rubber cushions or coil springs are used to achieve a very gentle end stop, adding to the gas spring effect. The coil spring length and force can be optimized for the application.

LIFT-O-MAT 特别产品类型

1 LIFT-O-MAT FR-任意停

LIFT-O-MAT FR是一种配有集成摩擦元件和特殊活塞组件的气弹簧，除提供支撑助力外，可在整个调整范围内实现任意位置停止。其在规定的范围内重量波动均匀，例如，其载荷的波动可被抵消。

2 HYDRO-LIFT

HYDRO-LIFT气弹簧的特质是其活塞带有阀门，除提供优化使用者的辅助力外，还可实现任意停功能。根据HYDRO-LIFT 的设计，其停止功能可以在整个调整范围内，或在一个和或者多个部分区域内实行应用。

3 INTER-STOP：开启时可全程或者部分行程任意停

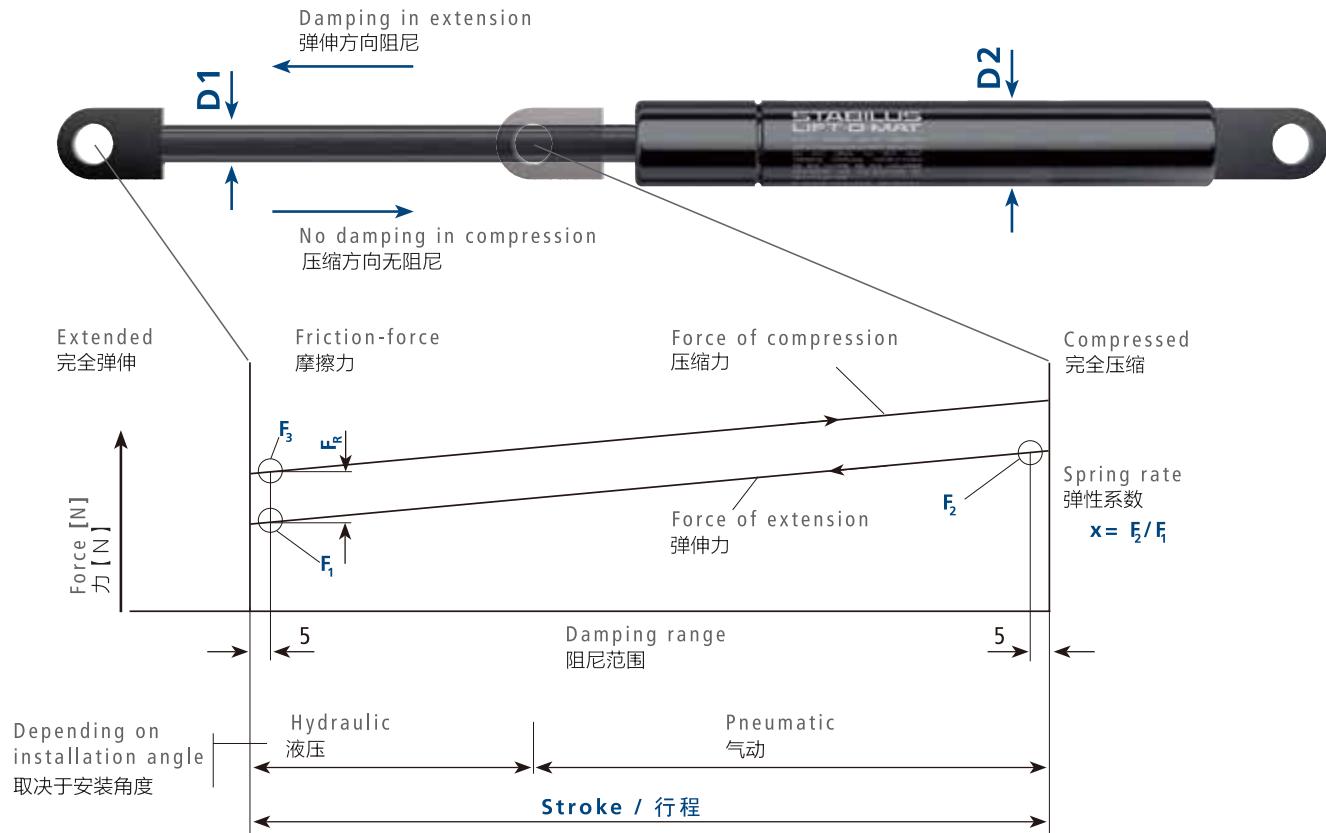

INTER-STOP气弹簧结合了LIFT-O-MAT动态阻尼气弹簧的特性和弹伸方向的夹持力。整个行程可以分为2个或者多个功能区。例如，一个功能区可执行停止功能或者将应用载荷固定在任何位置直至施加了手动力。

4 末端位锁止功能的 LIFT-O-MAT

除了提供支撑力外，具端位锁止功能的LIFT-O-MAT可在行程末端提供安全的机械锁止功能。通常有两种机械锁止方式：外锁止气弹簧和内锁止气弹簧。

5 具有递减或渐进式弹簧曲线的 LIFT-O-MAT

这种LIFT-O-MAT气弹簧带有附加螺旋弹簧，按安装方向的不同会在末端位置产生非常高或者非常低的弹簧力。根据应用和要求，橡胶垫或者螺旋弹簧可用于实现非常轻柔的末端停止，从而增加气弹簧的功效。在此种应用中，螺旋弹簧的长度和力值可进行优化。

Dynamic extension damping

The LIFT-O-MAT DD with dynamic damping is a gas spring whose damping properties and extension speed is controlled primarily through a longitudinal groove in the pressure cylinder.

By reducing or increasing the groove cross-section, the piston rod's speed can be varied over the entire stroke, allowing it to be customized to the application. The motion can be slowed down smoothly and continuously until it comes to a stop.

It allows implementing different compression and extension characteristics as well as a damped approach of intermediate positions.

The LIFT-O-MAT DD works regardless of its orientation, while approaching any position smoothly, without stressing hinges and joints.

Advantages

- Orientation-independent damping
- Definable speed control
- Great tunability of damping characteristics

Groove
纵向槽

Damping range
阻尼范围

弹伸方向上动态阻尼

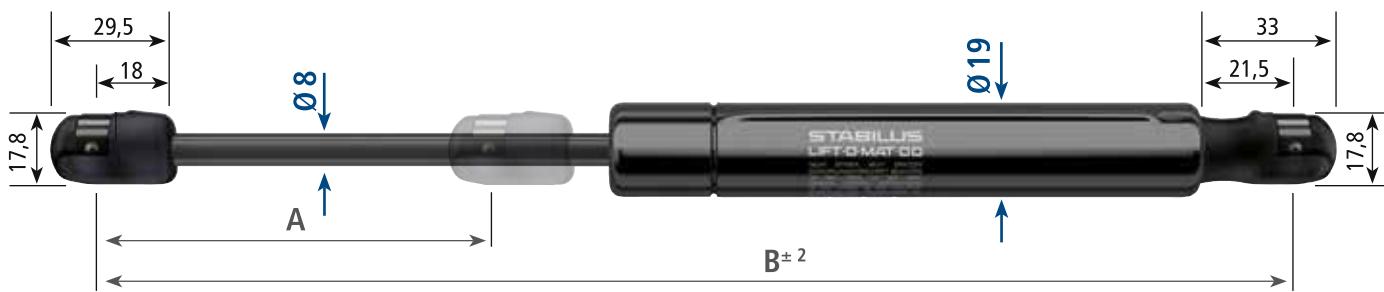

LIFT-O-MAT DD是具有动态阻尼功能的气弹簧。它是通过在压力管管壁开一个槽，这个槽的深度可以控制阻尼效果及弹伸速度。

通过增大或减小槽的截面积，活塞杆的速度可以在整个行程范围内去定制。从而符合客户的订制化要求，弹伸过程可以非常缓慢地减速直至停止。我们还可以实现不同的压缩及弹伸阻尼特性。

LIFT-O-MAT DD的作用不受安装方向的影响，可以平滑地弹伸到任何位置，不会对铰链或接头产生任何冲击。

优点

- 阻尼效果不受安装方向影响
- 可控的弹伸速度
- 阻尼特性丰富多样

Suitable for ball studs according to DIN 71803 Ø10

CAD-Configurator
CAD-配置

Stabilus.cadclick.com

For each of our gas springs and dampers, there are numerous potential variants. Use them to configure the product variant that meets your requirements. Our options are almost endless.

Choose from different strokes, lengths, diameters and different fittings made from metal or plastic (K1 - K7 and D1 - D7). F₁ force can also be selected individually. Optional guard or locking tubes (S1 or S2) are also available.

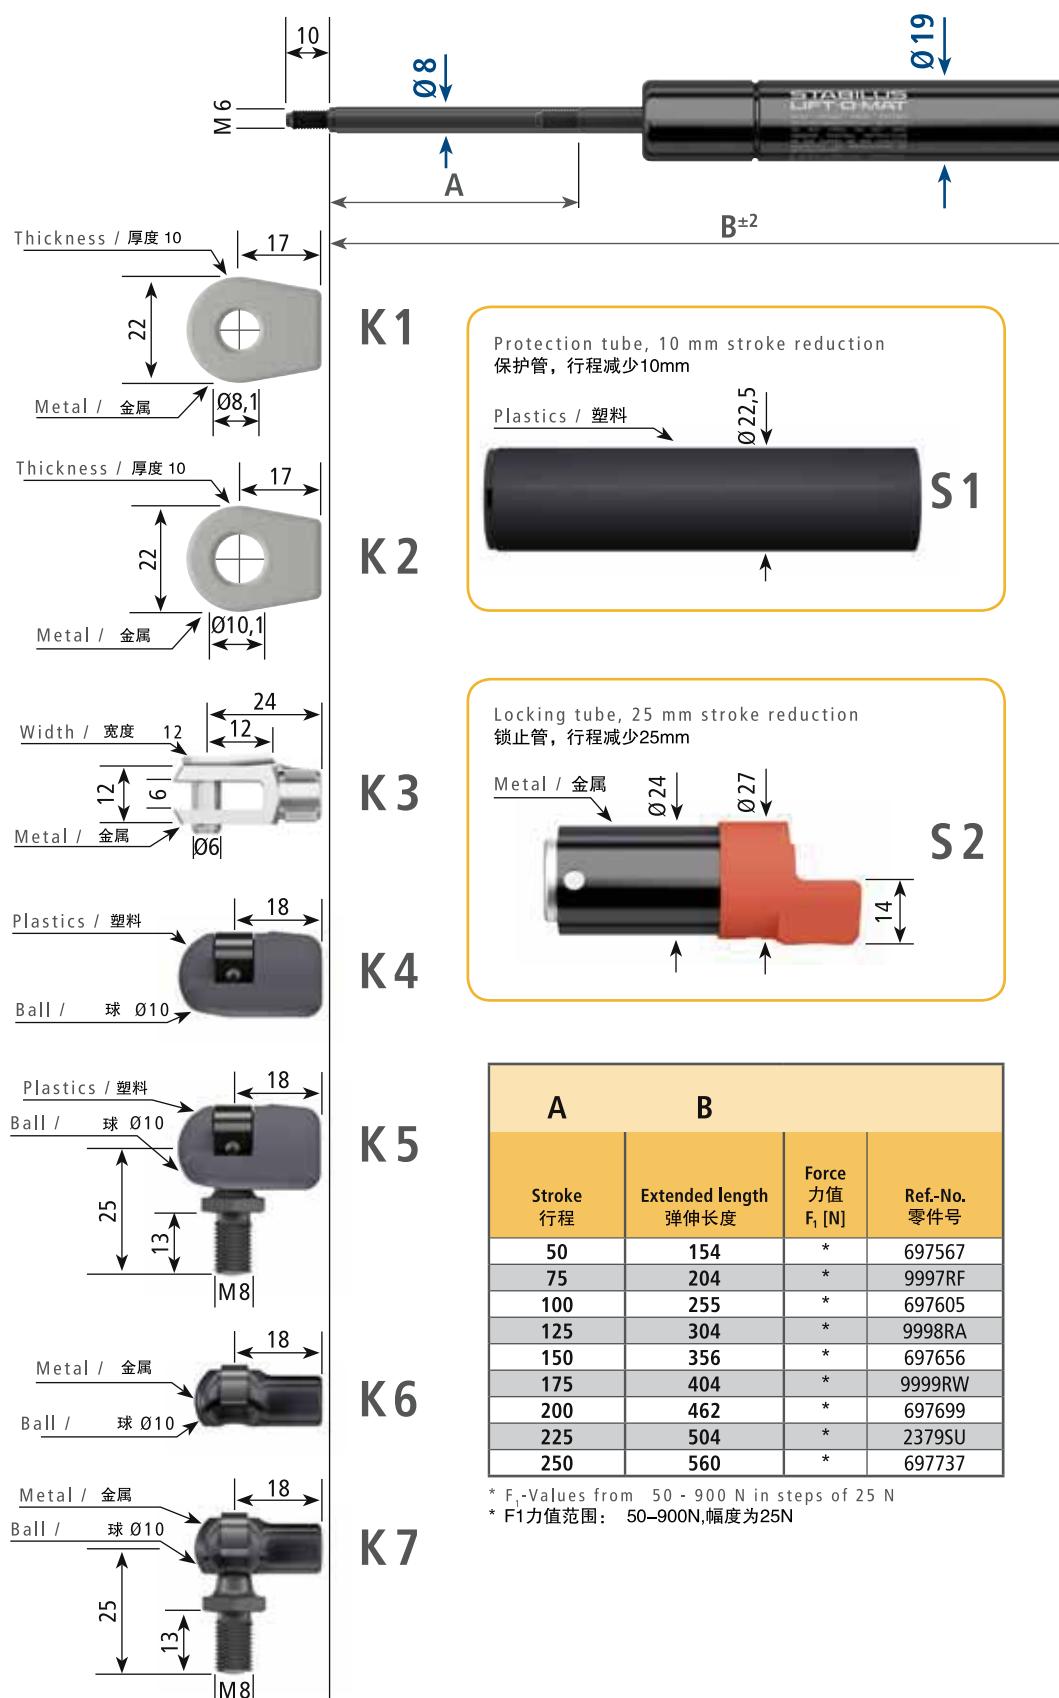

You can use our online CAD-Configurator to render your 3D model and your 2D drawing.

对于我们所有的气弹簧和阻尼器，存在很多潜在的变型。使用它们来配置符合您要求的变型产品。我们的选择几乎是无止境的。

选择不同的行程、长度、直径及金属或塑料（K1-K7和D1-D7）制成的不同配件。F1力值也可单独选择。防护管或锁止管（S1或S2）也可供您选择。

您可以使用我们的在线CAD配置提交3D模型或2D图。

Self-locking in compressed position

The LIFT-O-MAT PTL from Stabilus is a hydraulically damped gas spring with an additional mechanical lock in the compressed position.

Similar to the ballpoint pen principle, the lock can be released by a light push on the gas spring; the gas spring will then automatically extend with damping.

In addition to the force assist function, the LIFT-O-MAT PTL features an end position lock, eliminating the need for installing additional locking elements. At the same time, it is easy and convenient to use.

This gas spring is used in numerous applications, especially in contemporary designer and functional furniture.

Advantages

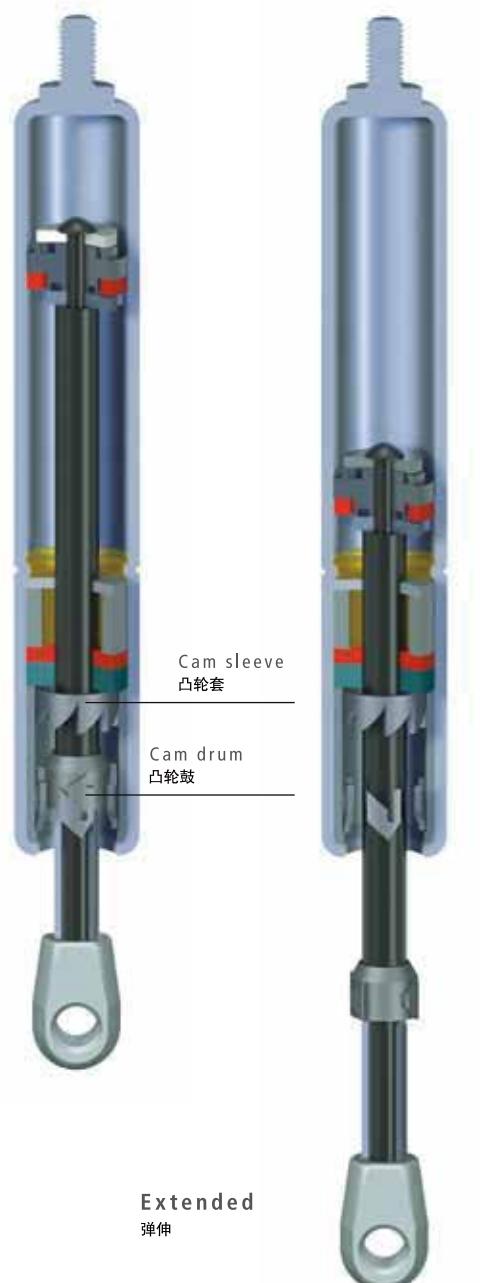

- Locking in compressed position
- End position lock without additional locking elements
- Simple release of the lock using the ballpoint pen principle
- User-friendly, convenient operation
- Maintenance-free

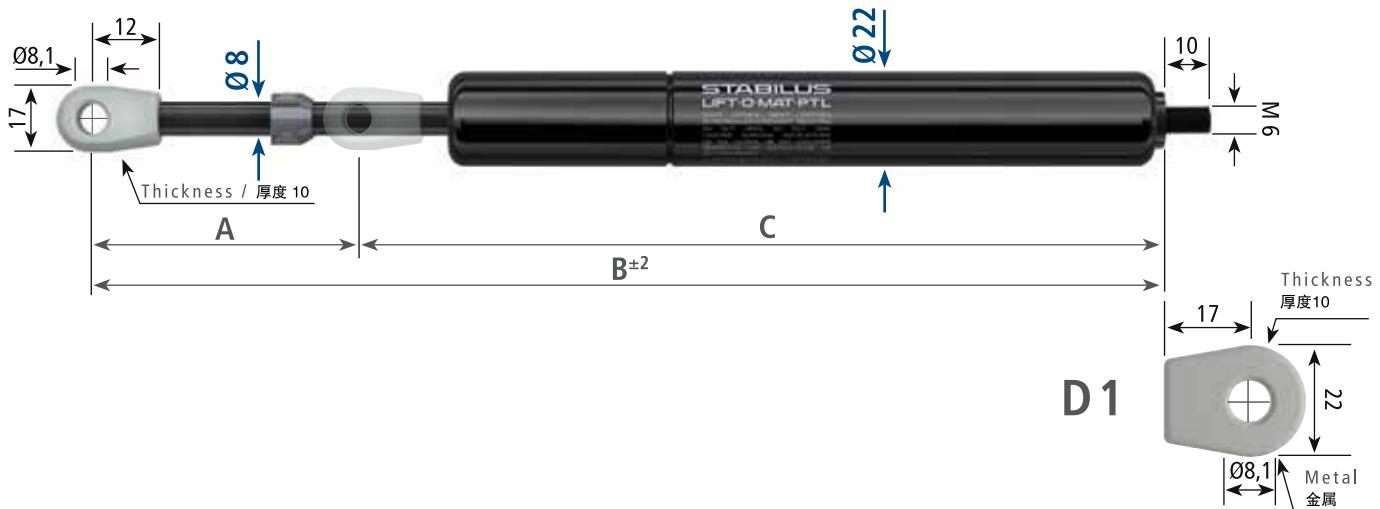

压缩位置自锁功能

LIFT-O-MAT PTL 是 Stabilus 带有压缩位置机械锁止功能的液压阻尼气弹簧，原理类似于圆珠笔，可以通过轻轻推动气弹簧解锁，然后气弹簧会自动带阻尼弹伸。LIFT-O-MAT PTL 不仅可以提供助力，有末端锁止功能，而且不需要另加锁止附件，结构简洁、使用方便。这种气弹簧应用非常广泛，尤其在现代时髦和功能性家具中。

优点

- 压缩位置锁止
- 无附件末端锁止
- 简单的圆珠笔释放原理
- 操作便捷
- 免维护

Stainless steel gas springs for the most demanding applications

The LIFT-O-MAT INOXLINE is a gas spring that is particularly corrosion resistant due to the use of AISI 316L steel (see DIN EN 100 88-1). It is used in critical environments, such as corrosive sea water, sea air or industrial exhaust gases.

Its corrosion resistance will ensure a high level of protection even during acid or lye exposure.

Carefully chosen materials for the LIFT-O-MAT INOXLINE components yield a virtually iron-free, non-magnetic product. This is especially attractive in medical and military technology as the stainless steel gas springs will barely interfere with the magnetic fields used in these indus-

tries. The oils used in the Stabilus INOXLINE gas springs are biodegradable and consequently eco-friendly; they are classified in the water hazard class "no hazard to water". This is especially important for the water supply and environmental technology areas.

Advantages

- High corrosion protection
- Non-magnetic
- Environmentally friendly fluids
- Compact design
- Maintenance-free

更多应用的不锈钢气弹簧

LIFT-O-MAT INOXLINE 是特殊防腐蚀 AISI 316L 不锈钢（参考DIN EN 100 88-1）气弹簧。应用于严酷的环境，如海洋、工业废气，确保即使在酸碱环境中也能保持优良品质。精益求精地选材铸造出LIFT-O-MAT INOXLINE无铁无磁的特性，可以广泛应用于医疗和军事科技无磁的环境中。Stabilus INOXLINE 气弹簧中的液压油属生物可降解和不妨害生态环境的油品，是“无水危害”级别的。这对于供水和环境科技领域的应用也是很好的选择。

优点

- 高抗腐蚀性
- 无磁
- 环保
- 设计紧凑
- 免维护

BLOC-O-LIFT – Locking gas springs

The BLOC-O-LIFT gas springs from Stabilus are so-called locking gas springs. They are used for functions such as adjustments with force assist, damping, as well as variable locking. Heavy flaps and lids can be moved easily and held safely in place.

BLOC-O-LIFT gas springs feature a special piston/valve system which separates the two pressure chambers in the spring. If the valve is open, BLOC-O-LIFT provides force support and damping. The linear spring characteristic curve will provide an even increase in force over the entire range of motion. If the valve is closed, the gas spring locks and provides very high resistance to any motion.

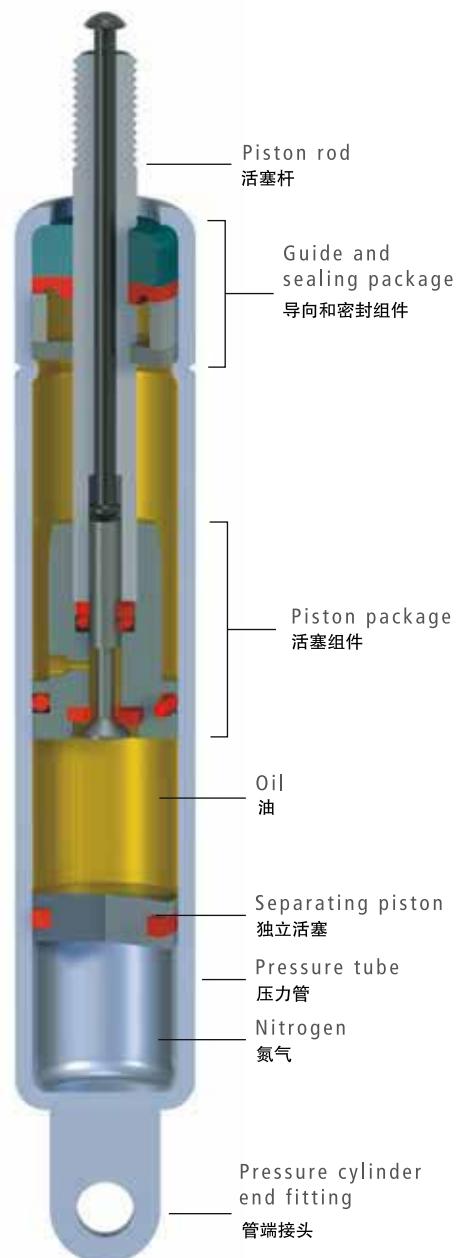

Primary application areas for BLOC-O-LIFT gas springs are furniture manufacture, medical technology, building technology,

aviation and aeronautics, ship building, automotive design, and many industrial applications.

Advantages and properties:

In addition to the benefits of the LIFT-O-MAT, the BLOC-O-LIFT offers

- Variable positioning with elastic or rigid locking in the tension or compression direction
- Rigid locking version is available as orientation-specific or non-orientation specific
- Depending on the application, available with patented, corrosion-free actuation tappet
- Different release systems available
- Two valve designs available:
Standard release 2.5 mm and seat valve 1 mm for short release distances

BLOC-O-LIFT – 锁止式气弹簧

BLOC-O-LIFT气弹簧是锁止式气弹簧，他们适用于需要力值辅助、阻尼以及各种锁定的任何场合。从而使重型翻门和盖板得以轻松地移动和安全地锁定。

BLOC-O-LIFT气弹簧的特性是拥有一个独特的活塞/阀门系统，它可以把气弹簧压力管分割成两个独立的腔体。如果阀门开启，BLOC-O-LIFT提供一个自由式气弹簧特性：支撑力和阻尼，在整体运动行程中力值曲线是线性的。如果阀门关闭，气弹簧锁定，并提供高强度阻力。

BLOC-O-LIFT气弹簧主要应用领域为家具制造医疗科技、建筑科技、航空航天、船舶建造、汽车设计等多种工业应用。

特性及优势

- 在满足所有LIFT-O-MAT优点的前提下，BLOC-O-LIFT另具有
- 在任意伸弹或者压缩位置的弹性或者刚性锁止
 - 特定安装方向和任意安装方向的刚性锁止
 - 根据应用要求可选择专利、防腐蚀释放头
 - 可选不同释放系统
 - 两种设计的阀可供选择：
2.5mm标准释放行程和1mm短释放行程

BLOC-O-LIFT specialty types

1 BLOC-O-LIFT with Override function

A special variation of this BLOC-O-LIFT gas spring comes with an additional override function. This function, designed for special customer requests, is to protect the application from overload. The override function is available in the tension or compression direction.

2 BLOC-O-LIFT OBT – locking in the compression direction

BLOC-O-LIFT OBT allows for convenient upward motion of applications, such as table tops, without the need to actuate a release. It is variably locking in the compression direction.

3 KOMBI-LIFT for special applications

The KOMBI-LIFT is a combination of a locking and non-locking gas spring; that is, a specified segment of the stroke can lock during extension. The functional ranges can be arranged in any location of the stroke. It is compressed independently of the lever position, like a standard LIFT-O-MAT.

4 HYDRO-BLOC

The HYDRO-BLOC is a locking element without extension force, with rigid locking in both directions. It is designed for applications requiring tuned damping and variable rigid locking that does not involve force assist.

特别产品类型

1 BLOC-O-LIFT带过载保护

带有过载功能的锁止气弹簧，在使用中可以保护超载，有利于用户操作。过载功能可运用在弹伸或压缩方向，并可在任意方向或垂直方向安装。

3 KOMBI-LIFT 特殊应用类型

KOMBI-LIFT是锁止和自由式气弹簧的结合体，它的特点是整个行程的一部分位置不可以锁定，表现如同普通的LIFT-O-MAT.

2 BLOC-O-LIFT OBT – 压缩方向解锁

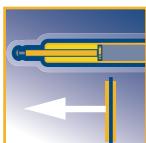

BLOC-O-LIFT OBT适用于不同的高度调节。无需释放装置就可以实现桌子向上调节，对于压缩方向，BLOC-O-LIFT OBT可以在任意位置锁定，例如床边桌。

4 HYDRO-BLOC

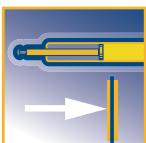

HYDRO-BLOC是一种没有弹力的锁止式气弹簧，它在弹伸方向和压缩方向都可以锁定。应用于只需要阻尼而不需要助力，并且在需要的时候能锁定的结构。

With especially flat spring characteristic

The BLOC-O-LIFT T gas spring, designed specifically for height-adjustable tables, has a very flat spring characteristic curve, providing virtually even adjustment over the entire stroke. This makes it easy to adjust the table top height, regardless of its weight, without the table losing stability or strength. The gas spring's compact design allows for rigid locking in any position of the long stroke while having a short compressed installation length. BLOC-O-LIFT T gas spring installation is not orientation-specific.

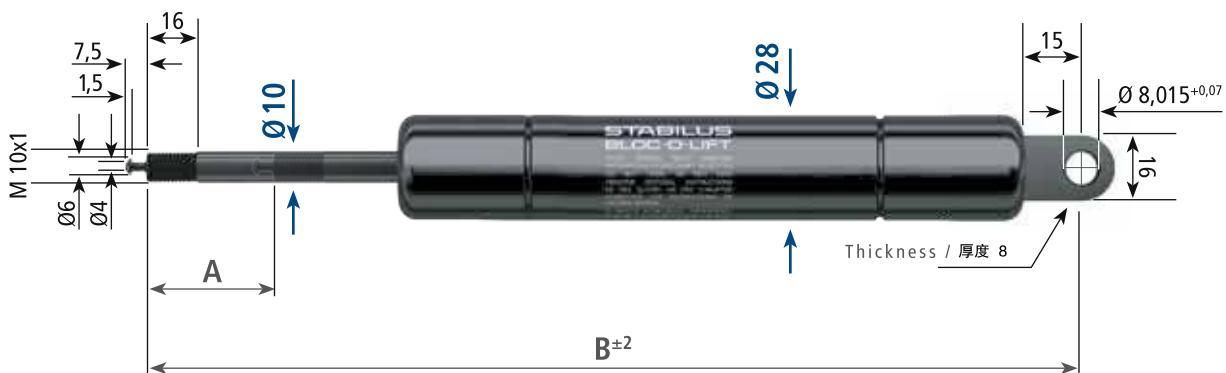

Consequently, the release mechanism can be mounted up for hand release or down for release by foot. It can be actuated with a suitable lever or bowden cable. There are numerous applications for BLOC-O-LIFT T, such as single- or dual-column tables, speaker pulpits, bedside tables or height-adjustable work surfaces.

具有平稳特性的锁止式气弹簧

BLOC-O-LIFT T 气弹簧专门为长距离高度调节桌板而设计，它拥有非常平稳的弹性曲线，能在整个行程中提供几乎均衡的支撑力。可以轻松调节桌面高度，而不论桌面承重是否变化，且高度调节过程中桌面能保持稳定和平衡。满足安装长度不足但需要大行程，并可以在任意位置刚性锁定。BLOC-O-LIFT T 气弹簧没有安装方向上的要求，因此，释放机构可以安装在上部靠手动释放，或者安装在下面用脚来释放。它可以由释放杆或拉线来释放。

BLOC-O-LIFT T 应用于多个领域，例如单柱或双柱桌子，讲台话筒，床边桌，或者其他需要高度调节的平台。

For a release unit with a bowden-wire longer than 400 mm a BLOC-O-LIFT with release way 1 mm is necessary.

对于拉线长度大于400的拉线，建议选择释放行程为1mm的BLOC-O-LIFT。

Mechanical release systems for ultimate convenience

In combination with BLOC-O-LIFT gas springs, the SOFT-O-TOUCH from Stabilus makes lifting, lowering and adjusting especially easy.

Our SOFT-O-TOUCH line provides complete release systems for Stabilus BLOC-O-LIFT gas springs. BLOC-O-LIFT gas springs that are difficult to access can be connected via pre-set bowden cables to push-buttons that can be placed in the ideal location on your application. Thanks to specifically tuned release heads, these ergonomic push-buttons are easy to operate.

High quality materials and a pleasing design allow their use in a wide range of high-end applications, both in the furniture industry and medical technology as well as in vehicle seats and in general mechanical engineering. A choice between buttons with axial and lateral bowden cable configurations will give you even more flexibility in your design.

Result: Convenience that will lend your products even more value.

便捷的机械释放系统

结合BLOC-O-LIFT 气弹簧，Stabilus的SOFT-O-TOUCH 按钮释放机构让举升、降低以及调整变得异常简单。

BLOC-O-LIFT气弹簧可以通过拉线连接远端的释放按钮，依靠特殊调整的高倍释放头，符合人体工程学的按钮得以轻松地操作。

高品质材料以及完美的设计可以让SOFT-O-TOUCH在高端领域得到广泛应用，如家具工业，医疗科技，汽车座椅以及工程机械中。

拉线有纵向和横向两种构造可供选择，以满足多种布局要求。

成效：便捷铸造卓越

STAB-O-SHOC – Oil-hydraulic dampers

Stabilus offers dampers for a variety of applications. Whether in automotive manufacturing, process technology manufacturing, industrial applications, or in the furniture industry – STAB-O-SHOC dampers from Stabilus are always there when it comes to positively affecting motion and vibrations.

The vibration system transmits motion into the dampers and converts the kinetic energy into thermal energy. Consequently, the damping forces generated will always depend on the piston speed. Hydraulic dampers with a modular piston system allow adapting the tensile and compression forces, which may differ to the application.

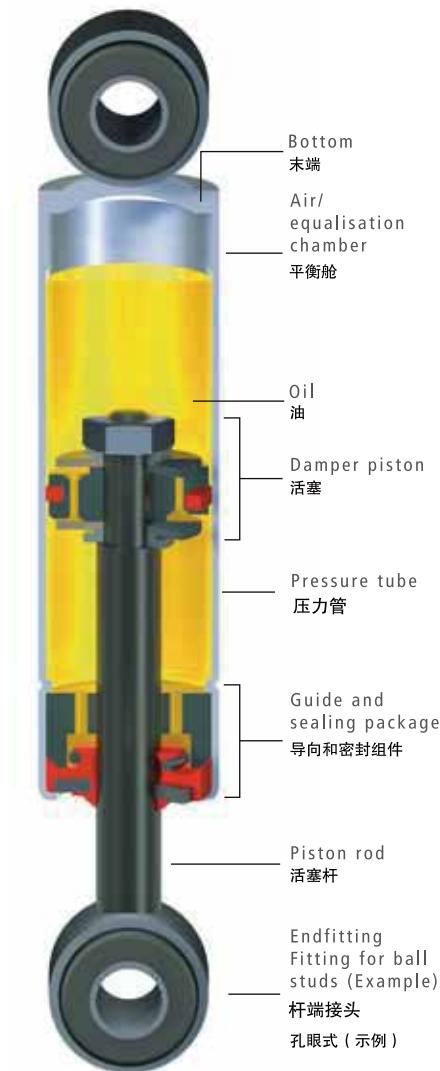

Characteristics:

- **Not orientation-specific:** Can be installed in any position.
- **Orientation-specific:** Install with piston rod down or up.

- **Friction fit:** When the load is reversed, the damping force will be actuated immediately. The force is transmitted without a no-load stroke.
- **No friction fit:** When the load is reversed, damping force and force transmission will be actuated with a delay.
- **Extension force:** Static extension force for the piston rod can be specified.

Advantages and properties:

- Easy opening and closing of doors and lids
- Dampened closing of doors
- Relieves the hinge mechanisms
- Will stay safely open
- Easy mounting
- Compact, attractive design
- Maintenance-free

STAB-O-SHOC – 液压阻尼器

斯泰必鲁斯为各种应用领域提供阻尼器，不论是汽车制造，科技生产，工业应用，或者是家具生产，斯泰必鲁斯所提供的 STAB-O-SHOC 阻尼器都能对运动和震动产生积极的影响。

震动系统把运动传递到阻尼器，同时动能转化为热能。因此，阻尼力大小取决于活塞杆的速度。液压阻尼器拥有模块化的活塞组件，从而适配伸展或者压缩方向上的力，以满足不同应用。

特点：

- 无方向要求
可以在任意位置安装
- 有方向要求
活塞杆向上或向下安装
- 摩擦配合
当载荷产生，阻尼力也立即反应，没有空载行程
- 无摩擦配合
当载荷产生，阻尼力会延迟反应
- 弹伸力
有弹伸力或无弹伸力的阻尼器

优势及特性：

- 轻松开启和关闭门或盖板
- 关门时带阻尼
- 减轻铰链及相邻组件的冲击
- 保持安全操作
- 安装简单
- 小巧精致的设计
- 无维修

STAB-O-SHOC motion and stop dampers

Uncontrolled movements when opening, closing, lifting or lowering lids are dangerous, inconvenient and they stress the material. Through their damping force, Stabilus motion and stop dampers support controlled motion

during lifting and lowering of lid applications; they also reduce material wear by avoiding hard stops in the end position. In addition to the standard damper types HD15 and HD24 described on the following pages, Stabilus also offers a multi-

tude of variants, such as the GD15 or GD24/29 SP. Find out more about these by contacting us.

STAB-O-SHOC vibration dampers

Undesirable vibrations can interfere with the smooth running of machinery and equipment, shortening their service life. Vibration dampers from Stabilus convert the kinetic energy of moving components into thermal energy, keeping applications in an

even workflow that is gentle on the material. They will absorb shock and avoid large oscillation amplitudes. With their HD24 MB types and the TA20, Stabilus offers standard products in this segment as well. For those cases where standard is

not enough, we can provide additional product variants, such as the GD15SP, HD24/28BV, or the TA30 or TA40.

STAB-O-SHOC 运动和停止阻尼器

不可控制的运动，如当开关，举升或降低门盖时是不舒适的也是危险的，并且冲击着各种结构。通过本身的阻尼力，斯泰必鲁斯的运动和停止阻尼器对举升和降低门板可以提供有效的控制，并且可以降低由于末端冲击而造成机构的磨损。

标准型阻尼器HD15和HD24

请查看后续详细描述

了解更多其他特殊阻尼器，如GD15, GD24/29

请联系我们特殊型阻尼器GD15

STAB-O-SHOC 震动阻尼器

无用的震动会干涉机械设备的平稳运行，缩短使用寿命。斯泰必鲁斯的震动阻尼器把动能转化为热能。甚至可以应用在生产线的物料处理中，这种阻尼器可以吸收震动避免剧烈振动。

标准型阻尼器HD24 MB和TA20

特殊型阻尼器GD15SP,HD24/28BV

或者TA30,TA40

STAB-O-SHOC HD15

Dampers for low damping forces
The standard STAB-O-SHOC HD15 is a non-pressurized damper. It is orientation-specific and achieves its optimum function in almost vertical

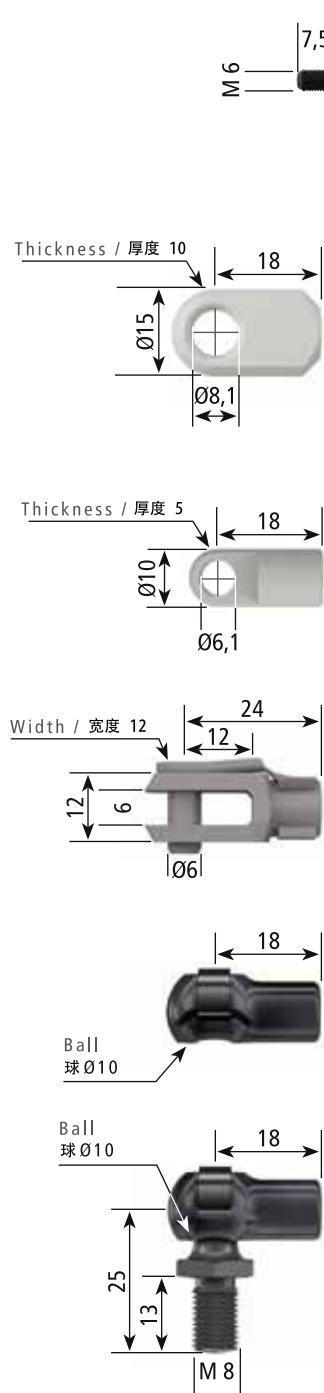

installation with force transmission without a no-load stroke in one direction of movement.

Special variants with horizontal function are also possible, as are

models providing force support during extension or path-dependent damping.

较小阻尼力的阻尼器

标准型号STAB-O-SHOC HD15是一种定向安装的非压力阻尼器，通常是垂直安装，无空行程。其特殊型号可以实现水平安装，在弹性方向或阻尼运动中提供力辅助。

STAB-O-SHOC HD24

Dampers for high loads

The STAB-O-SHOC HD24 from Stabilius is a standard single-tube vibration damper for versatile applications, especially for high

loads. Due to a special piston system with valve plates and a base piston with different reduction cross sections, this model is the ideal motion damper.

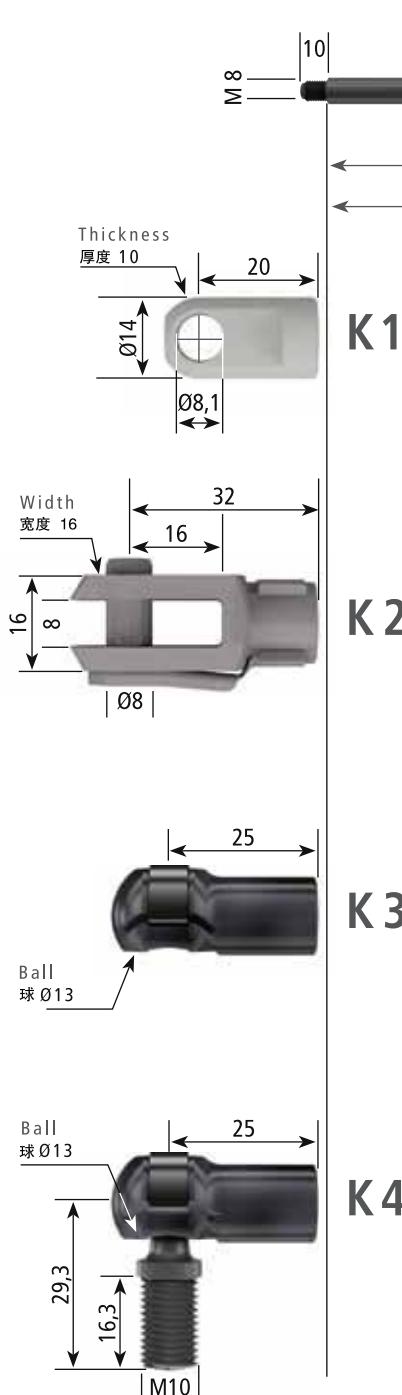

Because of its "open" equalization chamber, the damping force is delayed (slip or no-load stroke).

高负载阻尼器

STAB-O-SHOC HD24 是标准型单管震动阻尼器，应用广泛，特别是应用于高负载。

可在出厂前调试曲线以便适用于应用场合：
递增、递减或近似线性的曲线

拥有平衡舱，阻尼延迟（滑行或者空载行程）

STAB-O-SHOC TA20

Dampers with a special piston system

In the STAB-O-SHOC TA20, the purpose of the diaphragm against the outside of the pressure tube is to absorb the additional piston rod

volume for the shortest possible installation length. This provides slip-free force transmission in any mounting orientation. Due to the special piston system with valve plates, the damping forces can be

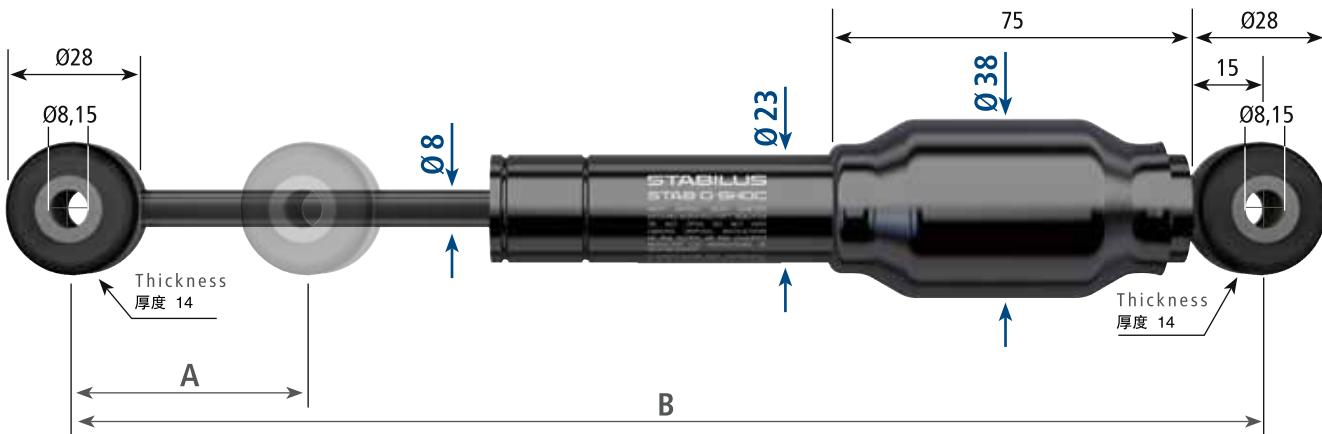

set variably and virtually independently of each other. This damper is also non-pressurized and features instant damping.

特殊活塞系统阻尼器

STAB-O-SHOC TA 20 补偿腔可以更多容纳活塞杆体积，从而满足更短安装长度的要求。无安装方向要求，

拥有阀片的特殊活塞系统，整个阻尼力可以做到线性可控

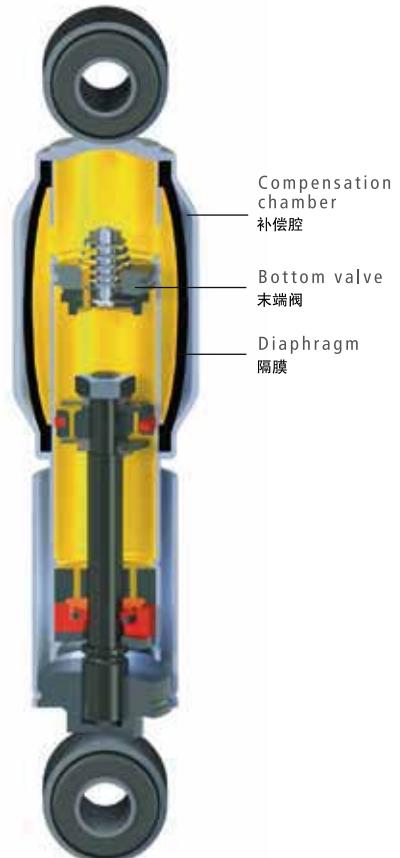

该阻尼器也是无压、即时型

STAB-O-MAT – Elastic locking gas springs

STAB-O-MAT springs are elastic locking gas springs, especially for variably damped seat height adjustment. STAB-O-MAT gas springs combined with an outer tube are called a STAB-O-MAT column. They are used in applications such as office swivel chairs, task chairs, executive chairs and stools.

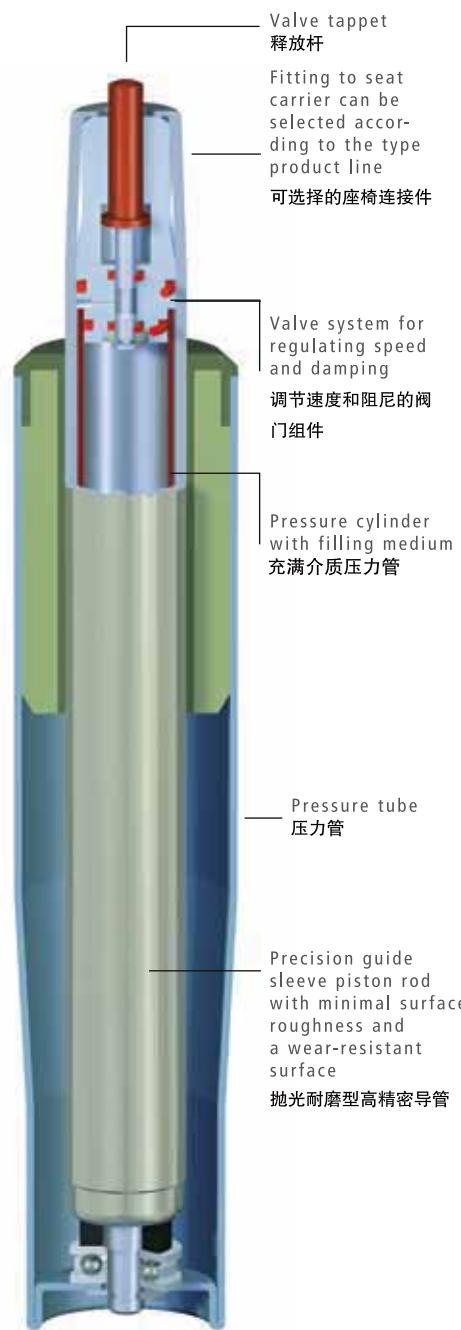

The locking function in the STAB-O-MAT gas springs is achieved through a valve at the pressure tube end. In this case, the piston of the STAB-O-MAT gas spring is closed.

Both the outer tube and the pressure tube have a taper to hold the swivel chair column in the star base and the seat base. In addition to the main characteristics, such as gas spring length and stroke, the outer tube's taper position is an

important characteristic where meeting the standard requirement for seat height is concerned.

Advantages and properties:

- Available as complete columns or individual gas springs
- Available in different lengths and with strokes of 50 to 300 mm
- Rotating and swivel resistant versions
- Telescope column with a disproportionate adjustment range
- Different end position cushioning action systems for more comfortable seating
- Adjustable tappet projection
- Different actuation systems

STAB-O-MAT – 弹性锁止气弹簧

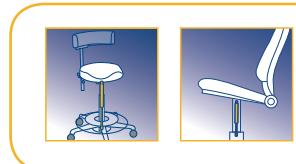

STAB-O-MAT 是一种弹性锁止气弹簧，专门为实现多种、舒适的座椅高度调整而设计的，STAB-O-MAT 气弹簧和外管组合在一起，称之为STAB-O-MAT圆柱。适用于办公转椅、工作椅、医师椅凳。

外支撑套管和压力管与座椅柱子锥形连接，安装在桌椅底座上。

并且气弹簧的主要参数，如长度、行程以及支撑套管的锥形位置是行业标准通用的。

优势及特性：

- 整套的支撑柱或个性化的气弹簧
- 行程50–300mm
- 可旋转或不可旋转
- 加长型的支撑柱
- 不同的末端缓冲系统，满足更舒适需求
- 可调节的释放装置
- 不同释放系统

STAB-O-MAT specialty types

In certain workplaces, seating furniture must fulfill special requirements. For example, the chair should not turn or roll away in the standing position and provide special comfort and durability for continuous use.

Stabilus offers a broad range of comfort and special functions for these purposes. The modular concept, which allows for a virtually unlimited combination of these functions, together with

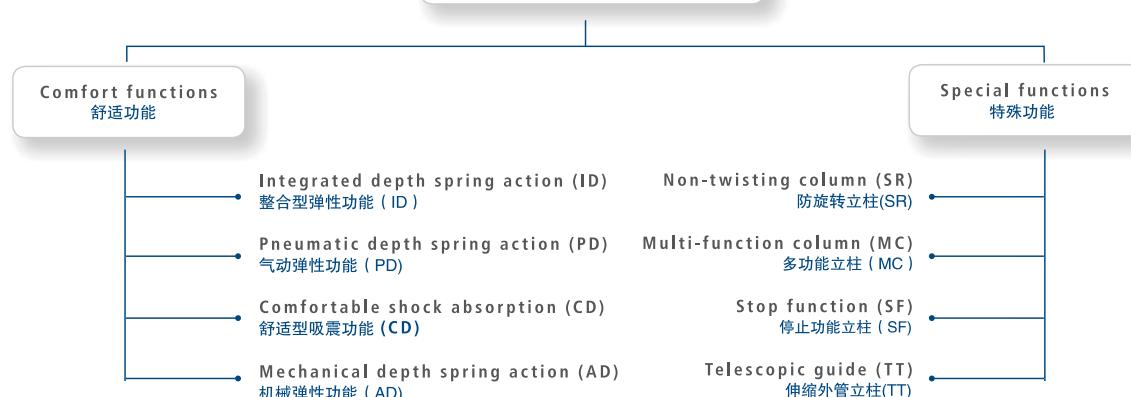

practically complete freedom in outer dimensioning will leave no wishes unfulfilled.

STAB-O-MAT 特殊型号

在一些工作场合，我们也融入了桌椅家具的特殊要求，如桌椅不能自旋或滚动，而要持久保持固定性和舒适性，Stabilus就为这些需求提供了广泛的应用。

模块化的概念可以无限的整合这些综合功能，并且可以完全满足各种外形定制化需求。

Comfort and special functions 舒适和特殊功能

Integrated end position cushioning (ID):
• Optimized shock absorption in the lowest seat position for ultimate comfort.

Pneumatic depth spring action (PD):
• Additional option for adding comfort in the lowest seat position.

Highest comfort properties (CD):
• Comfortable shock absorption over the entire stroke of standard height adjustment.

末端整合型缓冲 (ID)
-座椅最下端优化的吸震装置造就根本性的舒适

气动弹性功能 (PD)
-座椅最下端附加功能增加舒适性

加强舒适型 (CD)
-标准高度全行程吸震

Mechanical end position cushioning (AD):
• Special seating comfort over the entire stroke and in the lowest seat position.

Swivel resistant column (SR):
• Non-swiveling chairs for special requirements yet with the usual comfort features.

Multi-function column (MC):
• It will automatically return the swivel chair to the highest seat position and

末端机械缓冲 (AD)
-全行程以及座椅最下端特别舒适性

防旋转立柱 (SR)
-防旋转椅特殊需求并且兼顾舒适性
多功能立柱 (MC)
-当承载消除后，自动回到转椅的最高位置和初设方向。

to a defined direction when the load is lifted.

Column with stop function (SF):
• Above a fixed activation point, it will prevent the chair from rolling away.

Column with telescopic outer tube (TT):
• Larger adjustment range at lower seat position.

停止功能立柱 (SF)
-增加定位点可以防止座椅滚动

伸缩外管立柱(TT)
-低位大角度调整

STAB-O-MAT assembly programme

DIN EN 1335 knows only three seat heights, types A, B and C. Due to the wide variety of seat mechanism and star base variants available on the market, the DIN requirement regarding the design variables for a column (extended length, stroke, taper position on the outer tube, color, etc.) results in more than

2,000 individual gas spring designs that often overlap or only differ by just a few millimeters. In order to provide you, our customer, with a simple and transparent solution for finding the right gas spring, the Stabilus standard product line was developed. All common seat heights can be achieved by combining just

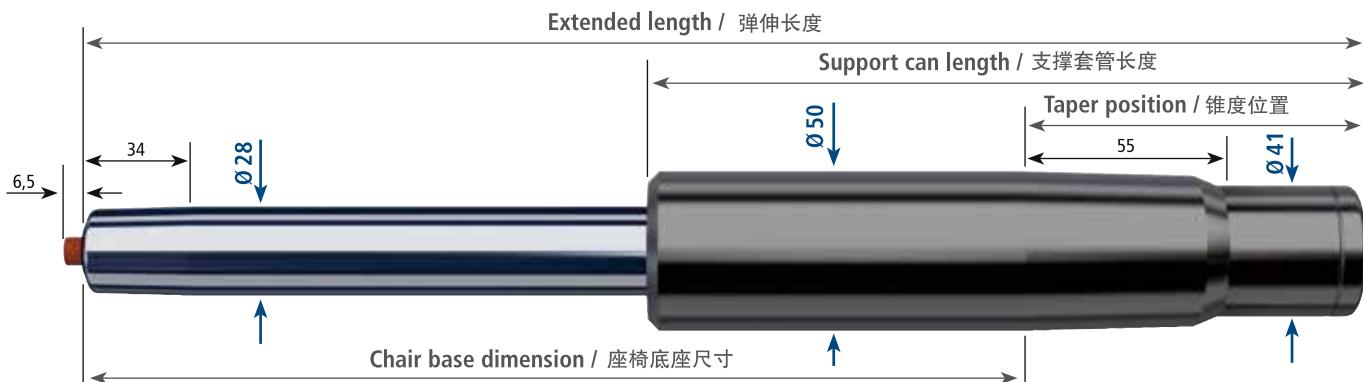

one single gas spring per seat height type with outer tubes featuring different taper positions.

And if you need a customized solution for your chair project, Stabilus application engineers and technicians will be at your disposal.

STAB-O-MAT 目录件

按照DIN EN 1335标准，共有3种座椅高度，型号A、B和C。由于市场上各种座椅结构和底座的不同，对立柱的设计要求（弹性伸长度，行程，支撑套管锥度位置，颜色等）也不同，从而可以对应2000多种的气弹簧，而这些气弹簧多是重复的或者仅仅相差几个mm.为给我们客户最简洁的方案，选择到最佳气弹簧，斯泰必鲁斯整合了标准工业线，所有通用座椅高度都可以通过结合单一气弹簧和不同的支撑套管锥度位置来满足。

并且，如果您有更多定制座椅需求，斯泰必鲁斯专业的应用工程师和技术人员随时为您服务。

Installation hints and tips on the correct installation of gas springs

■ Application

In their technical design, gas springs can be customized for special applications – on the basis of specifications and drawings. Match your application and requirements with us. Our consultants and application engineers will be glad to help you.

■ Mounting Orientation

If possible, install gas springs so that the piston rod points down in the inactive state – unless they were designed for non-orientation specific installation. This will ensure optimum lubrication of the guide and sealing system at all times.

■ No Jamming

For a long service life, gas springs must not jam or be subjected to bending or lateral forces. We offer suitable end fittings, such as angle joints. They will ensure non-jamming alignment.

■ Functional Safety

The functional safety of a gas spring comes mainly from the smooth piston rod surface and the seals that

keep the gas pressure on the inside. Do not subject gas springs to bending stresses. You should not install gas springs that have been damaged in after-sales mechanical processing. Welding on the gas spring, as well as contamination or paint on the piston rod can cause device failure. Avoid modifications and manipulations, impacts, tensile stress, heating, painting and removal of the print. Be on the safe side: Do not install defective or improperly altered products.

■ Temperature Range

Stabilus gas springs are designed for a default temperature range of -30°C to +80°C. Of course, there are also gas springs for more extreme applications.

■ Life and Maintenance

Gas springs are maintenance-free! They do not require greasing or lubrication. They are designed for their corresponding applications and should work flawlessly for many years.

■ Transportation and Storage

Store gas springs with the piston rod pointing down. Actuate the gas spring after 6 months of storage. Avoid damage: Do not transport gas springs as bulk material. Make sure not to contaminate gas springs with thin packaging film or adhesive tape.

■ Disposal

When gas springs are no longer needed, they should be disposed of in an environmentally correct manner. For this purpose they should be controlled degassed, the compressed nitrogen gas bled, and the oil drained. For more specific details, please refer to STAB specification 1000 9375. Please also consider our recycling instructions on our website <http://www.Stabilus.com/service-spare-parts/recycling/>

气弹簧安装建议和提示

■ 应用

在技术设计中，气弹簧可定制进行特殊应用——基于规范和图纸。使您的应用和要求与我们的相符。我们的咨询师和应用工程师很乐意帮助您。

■ 安装方向

如有可能，安装气弹簧时，使非工作状态时活塞杆朝下——安装方向无要求设计的气弹簧除外。以此确保导向和密封系统始终达到最佳润滑。

■ 无卡滞

在很长的寿命期内，气弹簧不得卡滞或者被施加弯曲或侧向力。我们提供合适的端头接头，比如万向接头。以确保无卡滞对齐。

■ 功能安全

气弹簧的功能安全主要源于活塞杆表

面光滑，且密封元件使气压保持在内。不得对气弹簧施加弯曲应力。不得安装售后机械处理后损坏的气弹簧。在气弹簧上焊接以及活塞杆污染或喷涂会导致装置失效。避免修改和操纵、冲击、张应力、加热、喷涂或印记清除。出于安全考虑，不得安装有缺陷或经不当改变的产品。

■ 温度范围

斯泰必鲁斯气弹簧的默认温度范围为-30°C到+80°C。当然，也有用于更极端应用的气弹簧。

■ 寿命和维护

气弹簧免维护！无需涂脂或润滑。用于相关应用，且能无故障运行多年。

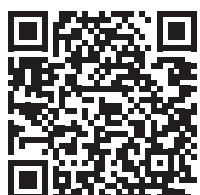

■ 运输和存储

存储气弹簧时，尽量使活塞杆朝下。存储

6个月后，运转气弹簧。避免损害：不得将气弹簧作为散装材料运输。确保不使气弹簧受到薄包装膜或胶带的污染。

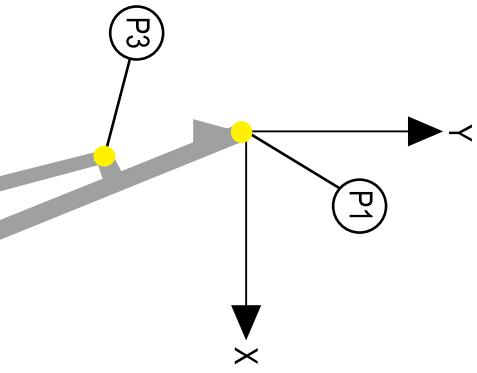

■ 处理

无需使用气弹簧时，应以环保正确的方式进行处理。为此，应对其进行排气，排出压缩氮气，并放干油。更多细节请参见STAB规范1000 9375。还请参考网站 <http://www.Stabilus.com/service-spare-parts/recycling> 上我们关于回收的说明。

STABILUS气弹簧选型参数表

位置	描述	X(横坐标)	Y(纵坐标)
P1	铰点(原点)	0.00	0.00
P2	开启时的手作用点		
P3	气弹簧固定点(安装在门盖上的位置)		
P4	气弹簧固定点(安装在机身上的位置)		
P5	重心位置		
P6	关闭时的手作用点		

选填 (如果气弹簧的安装位置有空间调整)

最大开启角度:		度
重量:		公斤
应用气弹簧数量:		支

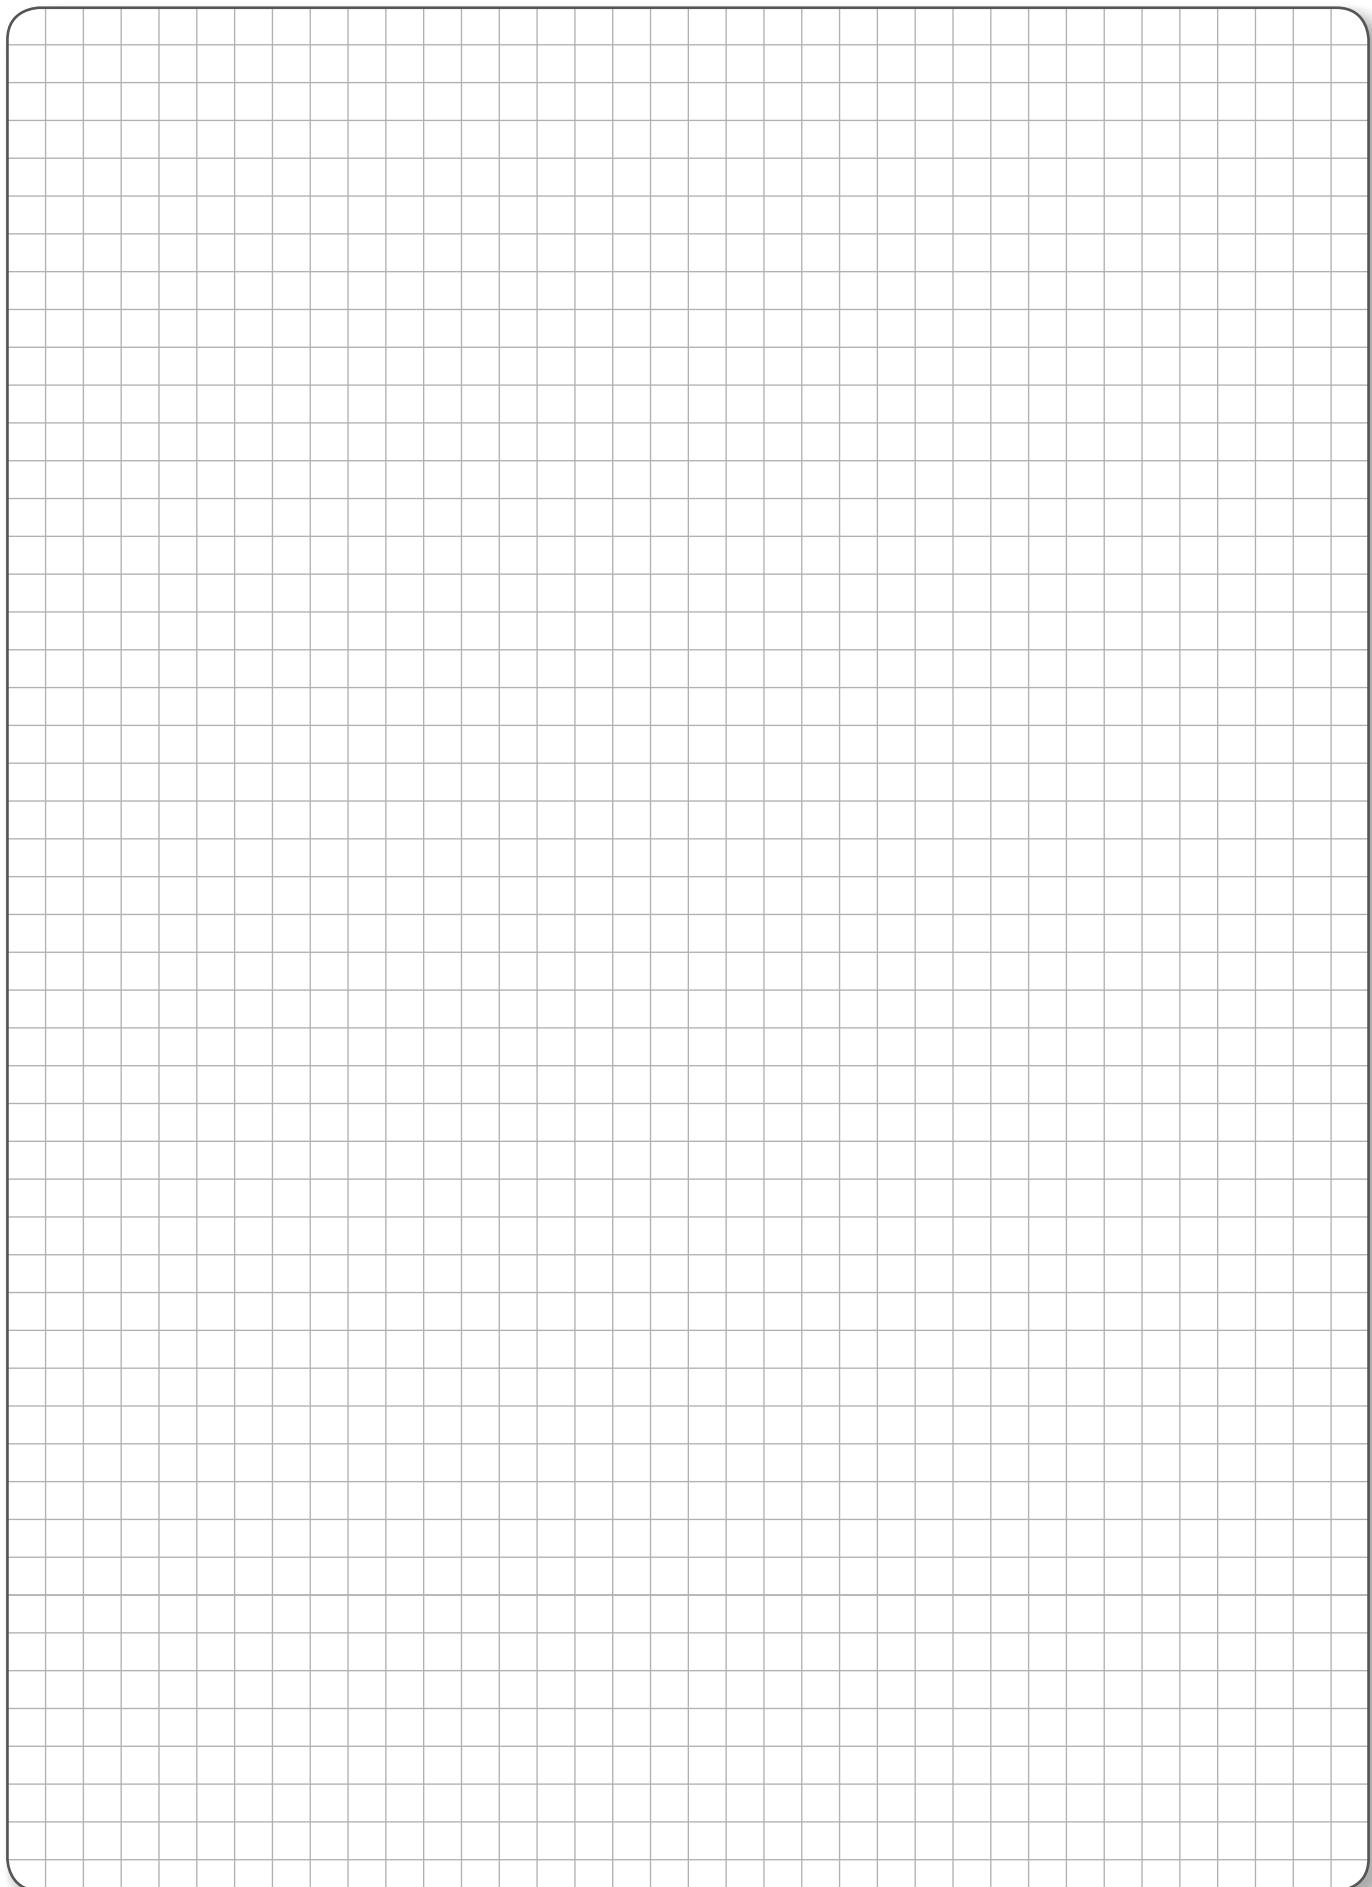

X(横坐标)	Y(纵坐标)
气弹簧固定点(安装在门盖上的位置)的调整范围	

气弹簧固定点(安装在门盖上的位置)的调整范围	
气弹簧固定点(安装在机身上的位置)的调整范围
